

*AMENDMENTS TO THE CLAIMS*

This listing of claims replaces all prior versions, and listings, of claims in the application.

1. (Currently Amended) A downloading service system for managing downloading services provided in a hotel in which a casino is ~~installed~~ located, comprising:

house card issuing means for issuing a house card which stores user information enabling identification of a user of ~~said the~~ said downloading services;

an intra-service server for transmitting casino data required for a casino game in response to a download request including ~~said the~~ said user information;

casino data reception means for receiving ~~said the~~ said casino data from said intra-service server; and

a service management server comprising means for managing a casino deposit which enables ~~said the~~ said user to utilize the casino services upon ~~acquisition~~ acquisition of ~~said the~~ said house card, with ~~said the~~ said casino data received by said casino data reception means, and for restricting use of ~~said the~~ said casino services by ~~said the~~ said user using ~~said the~~ said casino data based on the basis of usage restriction conditions placed on ~~said the~~ said casino deposit, wherein the house card is a guest room key for a user lodging in the hotel.

2. (Currently Amended) The downloading service system according to claim 1, wherein said service management server determines ~~said the~~ said usage restriction conditions according to ~~the~~ the presence or absence of a deposit balance indicating ~~the~~ the amount of money remaining in ~~said the~~ said casino deposit.

3. (Currently Amended) The downloading service system according to claim 1, wherein said service management server determines ~~said the~~ the usage restriction conditions ~~according to whether or not restricting use of the accumulated deposit over a predetermined time period~~ casino services when the casino deposit has exceeded an upper limit.

4. (Currently Amended) The downloading service system according to claim 1, wherein said intra-service server ~~further~~ comprises means for updating ~~said the~~ the casino data in response to an update request.

5. (Currently Amended) The downloading service system according to ~~claim 1~~ claim 1, ~~further~~ comprising:

a multi-media server for transmitting content data to said casino data reception means in response to ~~said the~~ the download request; and

a house card server for storing service data indicating use of the downloading services for downloading ~~said the~~ the content data.

6. (Currently Amended) The downloading service system according to claim 5, wherein said multi-media server ~~further~~ comprises means for updating ~~said the~~ the content data in response to an update request.

7. (Currently Amended) The downloading service system according to claim 1, ~~further~~ comprising an action history management server for managing ~~the~~ the actions of ~~said the~~ the user by obtaining ~~said the~~ the user information.

8. (New) The downloading service system according to claim 1, wherein the service management server restricts use of the casino services by the user using the casino data when the casino deposit reaches zero.

9. (New) The downloading service system according to claim 3, wherein said service management server determines the usage restriction conditions restricting use of the casino services when the casino deposit accumulated over a time period has exceeded an upper limit.
